Divya Goswami

Bangalore, Karnataka

Versatile Developer and Operational engineer with experience in system administration, site reliability, automation and programming. Deployed sites, automated manual workflows, debugged and analyzed server failure in the past. Capable of working under pressure and with patience.

Skills

- **Scripting and Automation:**
 - Scripts using **Bash** and **Python** over **AWS Lambda** and service scripts on k8s clusters.
 - Deploying clusters with **Ansible** script and monitoring health over **ArgoCD**
 - Pipeline setup over **Jenkins**
- Version control system: Demonstrate expertise in the knowledge of **GitOps**.
- **System Administration:**
 - Efficient both on **Linux** (4yrs) and **Windows** servers.
 - Tested deployments on local env using **VirtualBox**, **VMWare**.
 - AWS services handling **IAM**, **ECS**, **DynamoDB**, **EC2**, **ECR**, **S3**, **ELB**, **Lambda**, **VPC**, **Cloudwatch**.
 - **Kubernetes** Monitoring and Security with **Falco** and **K8scan**. **Secret Management** using **Hashicorp Vault** and cluster hardening based on CISA rules.
 - Hardening **Docker** images and setting up healthchecks for failed pipelines.
 - Setup dashboard over **Grafana** using **promql**
 - Currently building a tool for **Domain/IP Enumeration**.

Education

- **Heritage Institute Of Technology**
Btech in Computer Science
2018 - 2022, KOLKATA, CGPA 8.2

Certifications and Volunteering

- **AWS Community Builder**
- AWS Community Program
- **IBM Z Ambassador 2021**
- IBM Z, Your Big Year
- **GHC Scholar and OpenSource Mentor 2021**
- Anita Borg
- **Beginner in Linux Kernel Development (LFD103)**
- Linux Foundation
- **Linux Server Management and Security**
- University of Colorado System, Coursera

Experience

• DevOps Intern

March 2022 - May 2022

INDmoney, Finzoom Investment Advisors (P) Limited.

- Setting up metrics and alerts for RDS/ECS Services/Redis clusters using cli and setting up dashboard on grafana by linking cloudwatch logs using arn policy.
- Recording data of uncharted resources over excel sheet using 100% automated workflow.
- Setting up IaC using Terraform modules and progressing towards 0% manual devops workflow.
- Tag based cost allocation and migrating cost exploration from AWS to Grafana. Setting up Jenkins job for auto allocation of tags of every new resource
- Assigned with core deployment window. Issuing hotfixes and monitoring proper gitops deployment everyday.

• Dev(Sec)Ops Intern

September 2021 - March 2022

Trell Experiences Pvt Ltd.

- Implemented GitOps Security - access control and cicd pipeline upgrade
- Docker and Kubernetes Security - Deployed Vault and Falco via helm for secret rotation and management and monitoring events on k8s cluster. Created hardened Docker images for restricting privileges to running services.
- System-Admin, Security and IAM - Created scripts to scan unprivileged users using sudo on server, setup monitoring on grafana and promql for on demand log monitoring based on time period over kibana, automate exit policy for employees exiting the org. Segregated Windows server for separate vendor teams by user access management over Windows file system.

• Open Mainframe Project Mentee'21

June 2021 - Aug 2021

The Linux Foundation, IBM Z

- Revamped a Flask application for IBM Z
- Refactored 70% of code and improved UI and Backend.
- Scripted automations for pulling and formatting data for various Linux Distributions.
- Reduced 80% manual configging and reloading of server that helped moving forward with CI/CD Pipeline
- Tested deployments and used git submodules to make data import from different more flexible.

• Jr. DevOps Engineer

2020 Dec - 2021 Feb

Dynopii Pvt. Ltd.

- Administered 4 Ubuntu servers
- Surveilled application deployments on Digital Ocean.
- Wrote Dockerfiles and docker compose and tested deployment locally on VMWare.
- Setup fail2ban firewall for preventing online VoIP server attacks.
