# Divya Goswami

Edgbaston, Birmingham

Versatile Operational and Security engineer with experience in system administration, site reliability, automation and programming. Deployed monitoring tools and automated manual workflows. Capable of working under any environment.

## Skills

- **Scripting and Automation:**
  - Scripts using **Bash** and **Python** over **AWS** and **GCP** and service scripts on k8s clusters.
  - Deploying clusters with **Ansible** script and monitoring health over **ArgoCD**
  - Pipeline setup over **Jenkins**
- Version control system: Demonstrate expertise in the knowledge of **GitOps**.
- **System Administration:**
  - Efficient both on **Linux** (6yrs) and **Windows** servers.
  - **AWS** and **GCP** services handling
  - **Kubernetes** Monitoring and Security. **Secret Management**, cluster hardening based on CISA rules.
  - Hardening **Docker** images and setting up healthchecks for failed pipelines.

## Education

- **University of Birmingham**  
**MSc in Cybersecurity**  
2023 - PRESENT , BIRMINGHAM
- **Heritage Institute Of Technology**  
**Btech in Computer Science**  
2018 - 2022, KOLKATA, CGPA 8.2/10

## Certifications and Volunteering

- Scholarship to Attend BlackHat Europe 2023
- Student Ambassador for Msc CyberSecurity
- AWS Community Builder
  - AWS Community Program
- IBM Z Ambassador 2021
  - IBM Z, Your Big Year
- GHC Scholar and OpenSource Mentor 2021
  - Anita Borg
- Beginner in Linux Kernel Development (LFD103)
  - Linux Foundation
- Linux Server Management and Security
  - University of Colorado System, Coursera

## Experience

- **Site Reliability Engineer**  
June 2022 - August 2023  
**Workspan, Angad Corporate, Pvt, Ltd.**
  - Automation in GCP to Jira Integration, open firewall detection and removal, expired IAM access purging
  - CICD security scanning, SCA, SAST, DAST report creation.
  - Google Security Command Centre exploration and instructing strict adherence to security practices.
  - Secret Management, SSL certificate update, WAF configuration on GCP
- **DevOps Intern**  
March 2022 - June 2022  
**INDmoney, Finzoom Investment Advisors (P) Limited.**
  - Setting up metrics and alerts for RDS/ECS Services/Redis clusters using cli and setting up dashboard on grafana by linking cloudwatch logs using arn policy.
  - Recording data of uncharted resources over excel sheet using 100% automated workflow.
  - Tag based cost allocation and migrating cost exploration from AWS to Grafana. Setting up Jenkins job for auto allocation of tags of every new resource
  - Assigned with core deployment window. Issuing hotfixes and monitoring proper gitops deployment everyday.
- **Dev(Sec)Ops Intern**  
September 2021 - March 2022  
**Trell Experiences Pvt Ltd.**
  - Implemented GitOps Security - access control and cicd pipeline upgrade
  - Docker and Kubernetes Security - Deployed Vault and Falco via helm for secret rotation and management and monitoring events on k8s cluster. Created hardened Docker images for restricting privileges to running services.
  - System-Admin, Security and IAM - Created scripts to scan unprivileged users using sudo on server, on demand log monitoring based on time period over kibana, automate exit policy for employees exiting the org.
- **Open Mainframe Project Mentee'21**  
June 2021 - Aug 2021  
**The Linux Foundation, IBM Z**
  - Revamped a Flask application for IBM Z
  - Refactored 70% of code and improved UI and Backend.
  - Scripted automations for pulling and formatting data for various Linux Distributions.
  - Reduced 80% manual configging and reloading of server that helped moving forward with CI/CD Pipeline
- **Jr. DevOps Engineer**  
2020 Dec - 2021 Feb  
**Dynopii Pvt. Ltd.**
  - Administered 4 Linux servers
  - Surveilled application deployments on Digital Ocean.
  - Wrote Dockerfiles and docker compose and tested deployment locally on VMWare.
  - Setup fail2ban firewall for preventing online VoIP server attacks.
